-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2193

1. The abstract of the disclosure is objected to because abstract should include the technical disclosure of the invention as claimed. Correction is required. See MPEP § 608.01(b).

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-8 and 10-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nelson.

Nelson, e.g., see Figs. 3, 5-8, teaches the claimed combination elements. Fig. 5 shows "bias current source" (10), multipliers (65-68), summer (90) and shifter (75) [for providing the claimed "multi bit control signal"]. Fig. 8A shows the detail of multiplier (65) which receives the current sources (400).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 2193

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4, 9 and 12-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nelson.

Nelson has been discussed in the previous paragraph.

As per dependent claims 4 and 9, the claim adds the "current-to-voltage converter to convert current from the summer into a voltage". The feature is old and well known in the audio art. ). It would have been obvious to a person having ordinary skill in the art at the time the invention was made to apply the converter in Nelson, thereby making the claimed invention, because the proposed device is an analog filter having the converter feature as claimed.

As per claims 12-17, the claim adds the "digital signal source" and "analog signal receiver". These features are old and well known in the art. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to Nelson's analog filter in a system "digital signal source" and "analog signal receiver" as claimed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan V. Mai whose telephone number is (571) 272-3726. The examiner can normally be reached on Mon-Wed and Fri. from 9:30am to 2:30pm.
